

Portable WinUpack Crack+ [Mac/Win] (Final 2022)

Portable WinUpack is a small, handy and easy-to-use software for creating selfextracting archives. The software can extract and run both PE files and ZIP archives. PE files can be created manually or extracted from other archive files. ZIP archives can be created directly or extracted from other archive files. Portable WinUpack can create the following types of self-extracting archives: Self-extracting PE files
ZIP archives with PE files • PE files in ZIP archives Portable WinUpack is a portable software that does not require additional installations. It is a simple and

straightforward tool to create and extract self-extracting files. With a few mouse clicks, you can create ZIP archives. With just a single click, you can extract selfextracting files. After creating a ZIP archive, Portable WinUpack shows the list of contents with a preview of the files. You can select files and drag them to the WinUpack window. A small button with the name of the archive file is shown on the bottom right of the window. If necessary, you can change the location of the extracted files by clicking the button and dragging them to the desired folder. You can also close the window and return to the folder where the archive is. Portable WinUpack also supports ZIP archives that contain PE files. If the archive contains such files, you can create the corresponding self-extracting archive. You can rename the archive and the files inside it and add or remove files in the archive. Portable WinUpack's interface is very simple, allowing you to work quickly

without distraction. The program supports different formats of Windows installation file types, including X86, X64 and ARM. The program also supports files with the following extensions: EXE, MZ, PEM, PEX, RAR, SCR, STM, TAR, VEE, VSE and ZIP The program can pack files in the following volumes: • C:\Documents and Settings • C:\ProgramData • C:\Program Files • C:\Users • C:\Windows • C:\Windows\Temp You can copy the following Windows file types to an archive: • ActiveX controls • Certificates • DLLs • Essentials • Image files • OCXs • Plug-ins • Script files • Shortcuts • Services
